HOW IT WORKS

1 - Trigger

2 - Instructions

3 - Plan

4 - Outcome

Agent automatically reacts to triggers

When a new email arrives
Office 365 Outlook

Agent follows your instructions

- You are an agent that helps to evaluate and staff incoming engagement requests from clients.
- First, analyze the incoming email to extract key client details. Verify the engagement information and confirm the industry sector. Assess historical data and identify the required expertise. Assign a suitable partner and notify them. Log the engagement details and inform the engagement director.

Agent completes the ask using your data and knowledge

-  Engagement staffing logic
-  Submit engagement
-  Send an email
-  Retrieve partner
-  Message in Copilot

Agent generates a response
